

PATENT

Serial No. 10/015,841

Amendment in Reply to Final Office Action of February 23, 2005

IN THE CLAIMS

Please amend claims 1-2 and 8-15 as follows:

1 1. (Currently Amended) A method of providing position
2 information of at least a first mobile terminal and at least a
3 second mobile terminal, wherein the first and second mobile
4 terminals ~~are part of a mobile network~~, and wherein the ~~mobile a~~
5 network comprises position determining means to determine the
6 position information of the first mobile terminal, wherein the
7 first and second mobile terminals are not necessarily communicating
8 with each other, the method comprising:
9 - determining the position information of the first mobile terminal
10 by the position determining means, and
11 - transmitting the position information by the ~~mobile-network~~ to
12 the second mobile terminal.

1 2. (Currently Amended) The method according to claim 1,
2 wherein the first and second mobile terminals are subscribed to a
3 position information providing service offered by the ~~mobile~~
4 network.

Amendment in Reply to Final Office Action of February 23, 2005

1 3. (Previously Presented) The method according to claim 1,
2 wherein the position information is determined and transmitted at
3 the second mobile terminal's request.

1 4. (Previously Presented) The method according to claim 1,
2 wherein the second mobile terminal comprises a database with
3 entries for mobile terminals, and wherein the second mobile
4 terminal is arranged for requesting the position information for at
5 least part of the mobile terminals included in the database.

1 5. (Previously Presented) The method according to claim 1,
2 wherein the position information comprises position of the first
3 mobile terminal.

1 6. (Previously Presented) The method according to claim 5,
2 wherein the second mobile terminal comprises a compass or a GPS-
3 receiver for providing further position information of the second
4 mobile terminal, and wherein the second mobile terminal comprises
5 means for determining position of the first mobile terminal with
6 respect to the second mobile terminal from the position information
7 and the further position information.

Amendment in Reply to Final Office Action of February 23, 2005

1 7. (Previously Presented) The method according to claim 1,
2 wherein the position information comprises position of the first
3 mobile terminal with respect to the second mobile terminal.

1 8. (Currently Amended) A ~~mobile-transmission~~ system
2 comprising:
3 ~~a mobile network with at least a first mobile terminal; and~~
4 ~~at least a second mobile terminal; and~~
5 a network having position determining means to determine a
6 position information of the first mobile terminal; wherein
7 wherein the first and second mobile terminals are not
8 necessarily communicating with each other, and ~~wherein the mobile~~
9 ~~network comprises position determining means to determine a~~
10 ~~position information of the first mobile terminal, wherein the~~
11 position information is transmitted by the ~~mobile-network~~ to the
12 second mobile terminal.

1 9. (Currently Amended) A mobile terminal for conducting
2 communications over a ~~mobile-network~~, wherein the mobile terminal
3 is arranged for receiving a position information of at least one

4 other mobile terminal from the ~~mobile~~-network, said position
5 information being determined by a position determining means of the
6 ~~mobile~~-network, and wherein the mobile terminal is not necessarily
7 communicating with the at least one other mobile terminal.

1 10. (Currently Amended) The ~~mobile~~-transmission system
2 according to claim 8, wherein the first and second mobile terminals
3 are subscribed to a position information providing service offered
4 by the ~~mobile~~-network.

1 11. (Currently Amended) The ~~mobile~~-transmission system
2 according to claim 8, wherein the position information is
3 determined and transmitted at the second mobile terminal's request.

1 12. (Currently Amended) The ~~mobile~~-transmission system
2 according to claim 8, wherein the second mobile terminal comprises
3 a database with entries for mobile terminals, and wherein the
4 second mobile terminal is arranged for requesting the position
5 information for at least part of the mobile terminals included in
6 the database.

Amendment in Reply to Final Office Action of February 23, 2005

1 13. (Currently Amended) The ~~mobile-transmission~~ system
2 according to claim 8, wherein the second mobile terminal comprises
3 a compass or a GPS-receiver for providing further position
4 information of the second mobile terminal, and wherein the second
5 mobile terminal comprises means for determining position of the
6 first mobile terminal with respect to the second mobile terminal
7 from the position information and the further position information.

1 14. (Currently Amended) The ~~mobile-transmission~~ system
2 according to claim 8, wherein the position information comprises
3 position of the first mobile terminal with respect to the second
4 mobile terminal

1 15. (Currently Amended) The mobile terminal according to claim
2 9, wherein the mobile terminal and the at least one other mobile
3 terminal are subscribed to a position information providing service
4 offered by the ~~mobile-network~~.

1 16. (Previously Presented) The mobile terminal according to
2 claim 9, wherein the position information is determined and
3 transmitted at the mobile terminal's request.

Amendment in Reply to Final Office Action of February 23, 2005

1 17. (Previously Presented) The mobile terminal according to
2 claim 9, wherein the mobile terminal comprises a database with
3 entries for mobile terminals, and wherein the mobile terminal is
4 arranged for requesting the position information for at least part
5 of the mobile terminals included in the database.

1 18. (Previously Presented) The mobile terminal according to
2 claim 9, further comprising a compass or a GPS-receiver for
3 providing further position information of the mobile terminal, and
4 means for determining position of the at least one other mobile
5 terminal with respect to the mobile terminal from the position
6 information and the further position information.

1 19. (Previously Presented) The mobile terminal according to
2 claim 9, wherein the position information comprises position of the
3 at least one other mobile terminal with respect to the mobile
4 terminal.
